Closet Measurement Sheet

Measure your closet before you buy organizers.

Measurements (inches)

Closet width (wall to wall)	
Closet depth	
Ceiling height	
Rod height from floor	
Rod length	
Top shelf height	
Space above top shelf	
Door opening width	
Door swing clearance	

Plan

- ☐ Decluttered first (keep / donate / sell / toss)
- ☐ Counted long-hanging vs. short-hanging items
- ☐ Planned a double-hang section for short items
- ☐ Used the space above the top shelf for off-season items
- ☐ Checked organizers fit the door opening, not just the closet

Tip: Slim matching hangers are often the cheapest way to free up rod space.
